

# Premier Power-Ups: Developer Use Case Enablement

## Your Goal

Achieve ROI more quickly through faster feature implementation and fewer development setbacks

## Description

Kony support engineers will develop a compelling sample use case app to assist your developers with implementing Kony features into their application.

## What It Does For You

- Reduces the development learning curve to implement a specific use case scenario
- Quick solution for a development hurdle
- Creates a great way to learn Kony development best practices

## Requirements

- Use case
- Version of Kony plug-ins

## How It Powers Up Your Implementation

### Discovery

- Consider adding any new features available in the Kony platform to your roadmap

### Engagement

- Jumpstart feature implementation using sample code
- Use sample code that was tested against the Kony platform version

### Outcomes

- Faster implementation of new features leveraging expert Kony resources
